

BEAUTIFUL MODERN WORKSPACE

We're not bragging (well we are) but we really can offer you the best IT solutions, which are flexible and scalable, via our fully live 10GB Fibre connection.

Our **dedicated fully live 10Gb** fibre connection to the backbone of the internet will be faster than anything you have tried before! It also has an automatic failover built in, so in the unlikely event something goes wrong you will stay connected. Super fast wi-fi is already included. Your business will have its very own dedicated wi-fi connection to our ultra

fast 1GB wi-fi system. Which enables you to move around the building and stay seamlessly connected. **Need something more? [Then speak to us.](#)** We can provide solutions for your business – additional bandwidth, hard-wired solutions, phones and soft phones with a generous 5000 UK voice minutes per month are all available.

Our building wi-fi infrastructure has been designed and installed to offer robust, reliable super fast IT options to every business.

We have invested in the most up to date IT solutions available and created a selection of flexible solutions. This includes:

- 10Gb fully live ethernet connection into the building with automatic ethernet failover
- 10Gb fibre/CAT6 infrastructure throughout building
- Latest wi-fi-6 access points giving full site coverage
- Wired internet connections available with speeds from 10Mb to 1Gb (uncontended); low installation charges and flexible contract terms
- Cloud telephony solution available
- IT support available.
